

# Your path to a digital factory

The future of sheet metal processing

## Enabling SMEs to benefit from digitization.

Would you like to increase your productivity, secure competitive advantages, produce more cost-effectively and plan jobs better through digitization?

The solution is a uniform and easy-to-use software solution for interconnecting your machinery.

### Your benefits

#### Increased productivity

Direct status reports from machines make the production process transparent. This shortens processing time and enables rapid action in the event of machine downtime.

#### Efficient planning

The clear display of current orders with expected machining times, remaining running times and capacity utilisation provides you with an overview and improves your planning in the long term.

#### All-in-One solution

FactoryWare® MMS offers a manufacturer and technology independent interconnection of existing machines. It also ensures a smooth interaction with existing ERP, MES and CAD/CAM systems.

#### Ready-to-use solution

Easy and fast access by using the operating system of your choice. With low integration effort, individual machines immediately become a digital machine park.

#### Fair pricing

With its pay-per-use billing system FactoryWare MMS is fair, transparent and affordable with no hidden costs.

#### Key to success

The evaluation and visual representation of reliable data from FactoryWare MMS enables an exact cost accounting. This increases your competitiveness and the success of your company in the long run.

#### Recognize potential for improvement

Reports of important key figures show potential for improvement and shape the basis for strategic decisions by the management.

#### Highest standards for security and networking

State-of-the-art software architectures with a keen focus on highest industry standards and a hardware-secured connection ensures that your data belongs exclusively to you.

# Eckelmann – Partner for Automation and digitization

We are specialists for the **automation** and **digitization** of industrial manufacturing processes. As a **full-service provider**, we provide all services from a single source – from consulting planning to implementation and long-term support.

We **bring** automation technology and information technology **together** and create solutions for the **factory of the future**: smart – intuitive – autonomous.
